

AGENDA

McKenzie Stewardship Group

Thursday March 27, 2008 - 6:00-8:00 pm

Vida-McKenzie Community Center

Schedule

Time	Topic
6:00 pm	Review Agenda
6:05	Forest Restoration Science – Guest Speaker: Paul Anderson Our focus will be on the scientific context of modifying stand structure to influence stand development over time (i.e. Thinning) across the landscape. The discussion will be centered around the following: <ul style="list-style-type: none">• General models of stand development.• Potential objectives for thinning and the stages in stand development where thinning can be applied.• Structural features that we promote through thinning (i.e. legacy, downwood, etc).• Range of commercial thinning alternatives being evaluated across the region.• Gaps and skips (leave islands): Early stages of learning regarding restorative management to promote these stand attributes across the landscape. This is why we are pursuing an adaptive management approach that takes lessons learned and applies them.
6:50	Bridge Thin Update
7:10	Intermission
7:20	Group Structure Discussion <ul style="list-style-type: none">• Review the draft work plan• Discuss the role and purpose of the logistics committee• Develop ground rules• Discuss decision making methods
7:50	Recap Key decisions Next steps
8:00 pm	Adjourn
